

2018 BUYER'S GUIDE

OUR PRODUCT WARRANTIES

Regulators	Materials and Construction	Limited lifetime* and Hollis for Life* (Free Parts) *Proof that regulator was serviced, according to service interval, to qualify.
Buoyancy Compensators	Materials and Construction Requires Annual Service	Five year from date of purchase
LX Wings	Materials and Construction	Lifetime
Analog Instruments	Materials and Construction Requires Annual Service	Two years from date of purchase
Masks, Snorkels, Fins	Materials and Construction	One-year from date of purchase
Wetsuits	Materials and Construction	One-year from date of purchase
Drysuits	Materials and Construction	5-year warranty on construction. Does not cover damage caused by normal wear and tear, misuse or negligence. The warranty is limited to repair or replacement, at Huish Outdoors' option, and where permitted by law does not include consequential or incidental damages. This warranty is rendered invalid by unauthorized repairs. 1 year warranty on zippers and valves
Neoprene Accessories	Materials and Construction	One-year from date of purchase
Lights	Materials and Construction	One-year from date of purchase

BRASS SPG

PONY BOTTLE GAUGE

LOW-PROFILE BRASS SPG

BRASS SPG

The Hollis Brass Pressure Gauge is a solid and compact brass SPG. This rugged, easy-to-read gauge works great as a primary or even backup pressure gauge for the beginner to the most advanced technical diver. Gauge has a luminescent face for easy reading in low light or night diving conditions. Pressure gauge module has a durable tempered glass scratch resistant lens.

Luminescent Faceplate

Standard with Air Spool and Viton O-rings

Oxygen Clean

Available in 0-5000 PSI or 0-360 BAR

Chrome-plated brass housing with Bourdon tube

Scratch-resistant tempered glass

2" (50.8 mm) size

LOW-PROFILE BRASS SPG

The new Low-Profile Brass SPG with scratch-resistant lens, high-contrast background, luminescent needle, low weight and small size allow for a more streamlined rigging and are ideal for stage and deco bottles.

High-contrast black background and white markings

Luminescent needle

Standard with Air Spool and Viton O-rings

Oxygen clean

Available in 0-5000 PSI or 0-400 BAR

Super hard PVD coated brass housing with Bourdon tube

Scratch-resistant plastic lens

LARGE PONY BOTTLE GAUGE

The Hollis Pony Bottle Gauge is a tiny gauge that easily connects to the 7/16" high-pressure port of your pony bottle regulator or other alternate tank regulator to show pressure in an easy-to-read display. Any diver who has used a pony bottle knows the hassle involved with trying to find out how much air is in the tank. Switching regulators to view the primary pressure gauge or adding a separate pressure gauge to the pony bottle is a problem. Now with the Hollis Pony Bottle Gauge, all those headaches are over.

Eliminates Use of Standard Hosed Pressure Gauge

Compact Small Design

Large Numbers and Colored Indicators Easy to Read Display

Equipped with HP O-Ring Ready to Install

Nitrox compatible to 100% O2

Threads Directly 7/16" First Stage HP Port

Available in 0-5000 PSI or 0-400 BAR

Ideal for Pony Bottles, Deco Bottles or Back-Up Air Supplies

One-Way Safety Valve

2-Year Limited Warranty

200LX+DCX

"Whether it's a technical diver in a cave at 300 ft or a recreational diver on a reef at 40 ft, we only make our regulators one way: to the highest possible standard. Because lives depend on it." — Bob Hollis

Hollis' newest flagship regulator is the 200LX + DCX Regulator, designed by divers for divers. Every feature is designed with high performance and superior manufacturing at every step. The 200LX can be converted from a right-handed hose configuration to a left-handed hose configuration in a manner of minutes. The valve of the 200LX is "PVD" Industrial Plated. PVD is a super-hard coating that is by far the most durable coating available today. Superior quality that will outlast any traditional plating. The front metal ring, packing nut and inhalation knob are also "PVD" Plated.

All LX regulators come standard with MiFlex® hoses and orthodontic mouthpieces with dual color tabs. It comes standard in both YOKE or DIN configuration

The LX regulators come standard with the Hollis Lifetime Warranty, 2-Year Service Interval and Free Parts for Life

Pneumatically balanced PVD plated brass valve results in smooth, easy breathing

Reversible demand valve, can be converted from right-handed hose configuration to left-handed hose configuration

Diver adjustable inhalation knob, allows diver to customize inhalation effort

Adjustable Dive/Pre-Dive switch: Large Venturi lever has a soft rubber grip, which makes it easy to locate and use

Ergonomic exhaust channels bubbles away from field of view and reduces exhaust effort

Improved orthodontic mouthpiece with dual color tabs

PVD plated stainless steel metal ring, adjustable knob and Dive/Pre-Dive end cap

MiFlex® braided hose

Paired with the new DCX 1st stage

LIFETIME WARRANTY

FREE PARTS FOR LIFE

2-Year Service Interval with inspection

DCX

PHYSICAL VAPOR DEPOSITION (PVD)

Physical Vapor Deposition (PVD) is a time tested proven technology that has been used for decades in other industries and is now available for specific Hollis products. PVD is a collective set of processes used to deposit thin layers of material, typically in the range of few nanometers to several micrometers. This state of the art process provides a superior alternative to traditional "Chrome Plating", which is environmentally friendly and provides long lasting durability.

PART NO.	ITEM

240-2011-07-M	200LX + DCX DIN
240-2000-LX	200LX 2ND STAGE BLK

150LX+DC7

An additional regulator being added to the Hollis Regulator line is the 150LX, similar in design to the 200LX but without the PVD Plating.

The 150LX delivers great performance at a moderate price. This second stage is paired with the DC7 for a great travel-the-world design or for those divers looking for a regulator to provide performance during long deco stops.

The 150LX is paired with the HO2 1st Stage for an oxygen regulator that will never stop performing. Built for oxygen percentage 40% to 100%.

The front metal ring, packing nut and end cap in Stainless Steel.

All LX regulators come standard with MiFlex® hoses and orthodontic mouthpieces with dual color tabs. It comes standard in both YOKE or DIN configuration.

The LX regulators come standard with Hollis's Lifetime Warranty, 2-Year Service Interval and Free Parts for Life

Pneumatically balanced chrome-plated brass valve results in smooth, easy breathing

Reversible demand valve, can be converted from right-handed hose configuration to left handed hose configuration

Adjustable Dive/Pre-Dive switch: Large Venturi lever has a soft rubber grip, which makes it easy to locate and use

100LX OCTO

500SE+DC7

OLD SCHOOL. NEW TECH.

The 500SE utilizes a servo controlled valve to provide precision airflow and unparalleled performance for both air and trimix divers in a side exhaust configuration. To achieve this, we have perfected the original "lever-servo valve" we designed 35 years ago. Overbalanced diaphragm first stage also provides ideal hose routing for both backmount and sidemount users and optimum performance regardless of depth.

Pneumatically balanced servo valve system

Patented Orthodontic Mouthpiece for comfort and reduced jaw fatigue

Standard with 30" MiFlex® hose

Easily disassembled without the use of tools and underwater if necessary

Left or right positioning—no upside-down

Boltsnap tie point

First Stage Configuration: DC7

240-3625	500SE 2ND - W/O HOSE

DCX

Hollis' newest flagship first stage is the DCX, designed by divers for divers. Every feature is designed with high performance and superior manufacturing at every step.

The DCX is surrounded by the most durable coating available today, PVD. The DCX was been redesigned to reduce weight while improving angle of LP and HP ports to maximize hoses routing. Hollis has made it an industry standard to include the 5th LP port making the DCX the diver's first choice for back-mounted doubles, sidemount or even for the recreational diver that demands the same performance as a technical diver.

Lighter weight

PVD "industrial" plating - PVD (Physical Vapor Deposition) is a super-hard coating that is by far the most durable coating available today. Superior quality that will out last any traditional finish.

Unique over-balanced, diaphragm design - As the diver descends, the over-balancing feature allows the medium pressure gas in the hose to increase at a rate faster than ambient. This results in superior performance at depth.

2 HP ports and 5 LP ports for optimum hose routing

5th port allows for side-mount or twin cylinder set ups

An environmental dry system keeps water out of the main spring chamber thus preventing ice buildup and keeping salt and contamination out

Suitable for cold-water use

PHYSICAL VAPOR DEPOSITION (PVD)

Physical Vapor Deposition (PVD) is a time tested proven technology that has been used for decades in other industries and is now available for specific Hollis products. PVD is a collective set of processes used to deposit thin layers of material, typically in the range of few nanometers to several micrometers. This state of the art process provides a superior alternative to traditional "Chrome Plating", which is environmentally friendly and provides long lasting durability.

DC3

Built with the same quality as the DCX, without the swivel turret, the DC3 is the ideal 1st stage for double cylinder configuration as well as perfect for single cylinders.

Environmental sealing prevents internal corrosion, contaminants, and icing of the first stage

Withstands rigorous CE standard for coldwater performance

DC7

High performance over-balanced first stage provides progressively greater intermediate pressure as depth and gas density increases for superior gas delivery under the most extreme conditions.

Fixed hose routing ideal for both backmount and sidemount configuration

Environmental sealing prevents internal corrosion, contaminants, and icing of the first stage

Withstands rigorous CE standard for coldwater performance

Nitrox compatible to 40%

H02

With the bulletproof design of the Hollis HP5 Non-Balanced Flow-By Piston First Stage, the H02 First Stage is certified for up to 100% Oxygen Service thanks to highly specialized component materials and manufacturing processes. Cleaned and assembled in a clean room environment with specially designed materials, halocarbon based lubricants and color-coded for easy identification.

The Flow-By Piston Design is the only true Fail-Safe First Stage Design on the market. The Piston will automatically move downstream from the high pressure air coming from the Scuba Cylinder if there is an unexpected malfunction of the High-Pressure Seat. This feature guarantees a constant Gas-Flow to the Second-Stage Regulator. The Regulator First Stage weighs 8.3 oz (235.3 g).

ENVIRO-PRO

The Enviro-Pro is the first BC designed and developed specifically for Public Safety Divers and contaminated water situations. The jacket can be customized to meet your team's mission criteria with a unique a MOLLE strap system that allows you to customize the position of included pockets (weight or utility) to your preference. Tested in jet fuel, gasoline, diesel and MEK without delamination or fabric separation.

The Enviro-Pro is approved for use by NOAA Divers.

Contaminated water resistant—antimicrobial and antibacterial
MOLLE Strap System included
Reinforced black coated D-rings
PU coated webbing
7 oz double coated PU 400 denier nylon
12 lb QLR pockets included
40 lbs Lift
No additional discounts

BUOYANCY

HD-200

Comfort, function and durability, the HD-200 is everything the advanced sport diver could ask for. Fitted with a combination of Tech/Rec features that provide ultimate comfort and function. Heavy-duty construction and innovative design make this BC best in class.

35 lbs bladder S and M sizes, 45 lbs bladder L and XL sizes
1000 denier Cordura™ with PU lamination outer shell and 15 mm urethane internal bladder
Contoured, lightweight backpack with backpad, lumbar support, and a rolled neoprene comfort neck
New 10 lb (4.5 kg) pinch-and-pull weight pockets
5 lb (2.27 kg) non-dumpable rear weight pockets
System weight: 9.4 lbs (4.3 kg)
Traditional 2" waist strap with stainless buckle
2" Nylon waist strap with quick release buckle and 2" SS D-ring
New comfort molded backpad

L.T.S.

LIGHT TRAVEL SYSTEM

The Light Travel System (L.T.S.) is our latest warm water solution for traveling divers and destinations where weight restrictions are limited. Incorporating key features from our popular HD200, the L.T.S. is a weight integrated back inflation design with 30 lbs (13.6 kg) of lift, suitable for single AL80s and steel 85s. Its simple, non-modular design stows easy and weighs only 5 lbs.

Ideal for traveling divers, weighs only 5 lbs (2.27 kg)
30 lbs (13.6 kg) of lift capacity
Comfortable backpad
Chest and hip D-rings for accessories or sling bottle
Rugged 1000D nylon outer cover with 420D internal bladder
5 lbs dumpable integrated weight system
Available in four sizes SM, MD, LG, XL
Limited lifetime warranty

R.E.D.S.

RAPID EMERGENCY DEPLOYMENT SYSTEM

R.E.D.S. was developed for RAPID Response SCUBA Diving, when time is critical and delayed "suiting up" is not practical. Design features guarantee user front flotation and it is shaped to allow the rescuer to provide medical attention to a victim while towing fully inflated on the surface. The R.E.D.S. was engineered with routing for all air hoses placed internally to reduce drag and any chance of entanglements. In addition to public safety purposes, this BCD also serves as a great system for kayaking or boating allowing quick and easy deployment.

MOLLE Strap System
One size fits most
Stainless hardcoated D-rings
Rugged 1000 denier Cordura® outer cover, Serviceable 15 mm Polyurethane Internal Bladder
Contoured, lightweight backpack with backpad and storage pouch
2 shoulder stainless steel bent D-rings, 2 lower hip D-rings
Quick adjust waist strap and crotch strap
Left shoulder inflation with elbow
System weight: 5.5 lbs 40 lbs of Lift

HTS 2

HARNESS SYSTEM

The Harness Tech System 2 (HTS 2) easily switches from a single tank soft pack to a dual tank backplate system, the modular capabilities of the HTS 2 may be personalized to your needs.

- Streamlined modular harness system
- Comfort back pad with lumbar support
- Stainless steel D-rings and cam buckle included
- Adjustable sternum strap with 2 mounting positions
- New version with added carry handle
- Accommodates mounting of new S25-LX and S38-LX wings without STA
- Adjustable padded shoulder straps
- Optional 10 lb (4.5kg) interchangeable quick-release weight pockets
- 2 in (5.1 cm) webbing crotch strap with vehicle hook ring
- No-slip cam bands with plastic buckles

Wing Sold Separately

BUOYANCY

ELITE 2

HARNESS SYSTEM

Tech/Rec is at its best with the Elite 2 Harness. The Elite 2 Harness System offers you all the features of a technical harness with the added comfort that recreational divers look for.

- Adjustable shoulder straps with quick release buckles
- Easier donning and doffing of equipment
- Adjustable and removable shoulder pads
- 316 marine grade stainless steel
- Adjustable sternum strap included allows for custom fit
- System weight (harness only): 1.7 lb (0.77 kg)

SMS 100 DUAL

EXPEDITION GRADE

Our SMS 100 Sidemount system was designed not just with the sidemount cave divers in mind, but any diver. Whether you are a beginner, advanced or technical diver, this kit was designed for you. Suitable for sidemounting, double or single cylinders, but also for use with rebreathers or rear mounted singles. SMS100 Dual is redundancy designed for technical sidemount divers using wetsuits, and carrying multiple cylinders. This "go anywhere" system can be used in any environment from open water to the overhead environment. Ready to dive out of the box.

- 360 Degree wing—52 lbs lift
- Bulletproof construction
- Dual wing
- Redundant inflator system built in
- Centrally and uppermost located elbow to avoid overhead interference
- Upper / Lower cam band slots for rear mounted single tank
- Full visibility over your system
- Reduces additional gear
- Aids in transporting gear to and from the beach or boat
- Streamlines profile and reduces drag, increasing bottom time
- Rigging kit included: tank bungees, SS Cam bands, SS Bolt snaps and nylon line

SMS 75

Hollis has become a leader in the sidemount market. It is not just a fad and not just a tool for cavers, it's here to stay and is growing. The SMS 75 is an evolution from years of sidemount development. While it will cater more to hardcore cave divers, SMS 75 was created to handle all environments. Proper trim is key, and the wing is designed to promote horizontal diving with increased lift towards the hips where it's needed most. The SMS 75 will also support rear-mounted tanks and reversible inflator positions.

Trapezoid shape to promote horizontal trim

Adjustable and removable wing bungee

Designed for cave or open water sidemount

Cam slots for single tank and grommets at 11" for banded doubles

Reversible Inflator and dump assembly

Rigging kit included: tank bungees, SS Cam bands, SS Bolt snaps and nylon line

Includes sternum strap and crotch strap

Inner located elbow to avoid overhead interference

BUOYANCY

SMS KATANA

CUTTING EDGE

Honed by extensive testing and refinement, the SMS Katana, designed by Nick Hollis in partnership with leading cave diving instructors, is a cutting edge cave penetration tool without equal. The SMS Katana design builds on the proven SMS100 and SMS75 sidemount systems but was further streamlined to reduce drag and allow for easier movement in confined spaces providing optimal performance in the warm water cenotes and caves of northern Florida and Mexico.

Bulletproof construction

35 lbs. of lift. The perfect wing size and weight for travel.

One size fits all "H" harness

3 weight pockets: two 5 lb. (2.26 kg) and one 3 lb. (1.36 kg)

8 strategically placed D-rings: 2 on each shoulder strap, 1 on each hip/shoulder strap connection point and 2 rear, one left and one right, for securing main tanks or other accessories.

Reversible inflator and dump assembly

Primary bungees integrated into the wing to pull tanks up and away from diver's torso

Retainers located to avoid overhead interference

Rigging Kit not included

OPTIONAL ACCESSORIES

Butt-plate with heavy-duty rails

Storage pouch with SS bolt-snaps

Mains Rigging Kit

LX SERIES WINGS

BACKMOUNT SERIES

Hollis proudly presents the LX Series Wings, developed and tested by technical divers, and 3 years in the making. Quality and performance are the two most integral features of this product, which is why Hollis reintroduced the proven S Series and C Series Wings with key improvements.

Every wing in the LX Series includes a 360-degree internal retraction system that matches the design of the wing, allowing for a streamlined rig at all times. The exterior bladder is constructed of 1680D Cordura, the internal bladder of 420 nylon, which means these wings are tough. We're so confident in the LX Series, every new LX wing includes a lifetime warranty.

1680D Cordura Exterior Bladder
420-Nylon Internal Bladder
360° Degree Internal Retraction System for a streamlined rig at all times
New Oval Corrugated Hose Power Inflator Mechanism
Redesigned overpressure relief valve (OPV)
Corrosion-resistant stainless steeldrain grommets
Welded Flange and One-Piece Retainer: Servicing w/o need-for-tools
Centrally-Located Inflator Mechanism Elbow: Avoids tank valve/regulator interference
Single Wing: Lower Left Pull Dump/Overpressure Relief Valve
Dual Wing: Lower Left and Lower Right Pull Dump/Overpressure Relief Valves
Hollis Power Inflator System: Durable impact resistant plastic with a corrugated rubber hose
Internal Components and Inlet Quick-Disconnect Nipple: Corrosion-resistant chrome plated brass
Cam Band Slots for cylinder mounting

DX-300X

DRYSUIT

The DX-300X is the newest addition to the Hollis exposure line. Developed over three years in a variety of demanding conditions, it is maneuverable and comfortable while ensuring long wearing durability.

The DX-300X is the benchmark expedition-grade drysuit, made from TriLaminate Cordura® for superior strength and comfort. Overall material weight is 700 g/sq.

“Outer Layer” is a heavy-duty Cordura® which offers superior puncture and abrasion resistance with incredible tear strength in excess of 300N

The middle “Butyl Mass” is constructed of 12 layers to provide long-term water integrity with superb chemical and ozone resistance

“Inner Liner” is a silk weave polyester offering the optimum comfort and softness with easy donning and doffing

Our patented BIAS cut combined with a telescopic torso increases freedom of movement, but allows for a closer fit reducing air migration

The wide, flat seam construction minimizes the risk of leaks in high risk areas

Fitted with YKK zipper

Fitted with SiTech Neck Tite system with silicon seal

Fitted with SiTech Quick Change Solution Oval wrist system with silicon seals as standard

Two large Velcro® bellows pockets with an internal D-ring

Double thickness kneepads

5 mm neoprene socks

Adjustable suspenders included

5-year warranty on workmanship

Photo shows Drysuit Gaiters and Canvas Overboots on him. Each sold separately.

BTR-500

DRYSUIT

The new BTR-500 drysuit uses our latest Butyl Trilaminate Ripstop material to produce a lightweight but very durable suit. Everything from the material to the taping has been fine-tuned and optimized to make the BTR-500 an absolute pleasure to dive in, whether you are at 10m or 100m.

The BTR-500 uses our specially developed 600g/sqm Butyl Trilaminate Ripstop material which incorporates a 140g/sqm High Decitex Nylon 6.6 Ripstop external lining for optimum tear, puncture and abrasion resistance that has the benefit of a easy clean and wash down finish. The internal lining is made from a patented coating that maximizes water integrity and seam tape adhesion as well as making the suit easy to get in and out of. The internal coating also make suit repairs exceptionally easy.

As with all our suits, each panel that makes up the BTR-500 is cut on the bias of the material to increase the stretch and flexibility of the material by up to 15%. This, combined with clever panel designs, makes this front entry suit especially easy to get on without the need to struggle to get the neck seal over the head. A composite zip maintains flexibility in the torso and is protected by a Velcro secured flap.

Si-Tech inflator and auto shoulder dump

Composite front entry zip

Latex neck and wrist seals

Internal suspenders

Two front mounted zippered leg pockets

5mm thick neoprene socks

NEOTEK 8/7/6

SEMI-DRY

Enjoy the warmth of our Neotek 8/7/6 coldwater hooded semi-dry. Constructed from a compression resistant 8/7/6 mm neoprene and a Hollis exclusive ThermaSkin inner liner. Includes a front neckdam with revolutionary G-lock horizontal front zipper for easy on/off and a tight barrier against water intrusion. Arms and legs are also sealed against leaks with an internal dam. All seams are double glued and butt joined with a blind stitch construction which is all covered by a unique liquid seam. Fitted with generous pockets on both the left and right thigh and comes in 9 different sizes.

- 8/7/6 mm compression-resistant and superstretch neoprene mix
- Exclusive "ThermaSkin" inner liner
- G-lock horizontal front zipper with internal bib
- Neck, wrist and ankle internal dams
- Seams are quadruple glued and butt joined with a blindstitch
- Liquid glued seams cover entire suit
- Tech-friendly thigh pockets on both left and right thigh
- Attached hood standard
- Seams sewn and double taped for extreme protection

AUG 260

ADVANCED UNDERGARMENT

Made from a 260 gm combination of soft touch plush brushed polyester fleece and spandex for the utmost comfort, AUG 260 traps air within the plush fiber. It maintains a protective warm air layer between the diver and the outside environment. AUG 260 has super stretch which allows 4-way flexibility while still retaining its original warmth and strength. AUG 260 comes in a range of unisex sizes, and is sold as a separate top and bottom, allowing mix and match of sizes if required.

Unisex
Available in top or bottom
Technical fleece material
Layering garment
Machine washable

AUG 260 SOCKS

AUG 260 socks are constructed with a single layer, 260 gm stretch fabric, keeping your feet warm and dry. Their excellent wicking properties and low bulk allow them to be layered with other thermal socks for colder dives. Machine washable.

AUG BASE

ADVANCED UNDERGARMENT

AUG Base is an ultra-fast wicking fabric, designed as a base layer that draws moisture away from the body, effectively keeping the skin drier, and allowing any additional undergarments the optimal chance to maintain body warmth during and after the dive. Fully machine washable, and the wicking properties won't be degraded by the washing cycle.

Made from a combination of polyester fleece and spandex for the utmost comfort, AUG Base comes in a range of dedicated Men's and Women's sizes, and is sold as a separate top and bottom, allowing mix and match of sizes if required.

M1

The M1 Mask raises the bar for optical quality and distortion-free vision. The lens is made from Saint-Gobain, a highly transparent extra clear glass which is valued for its unique appearance and optical qualities. The low iron oxide content gives it optimum clarity. Its light transmittance is greater than that of conventional glass. The use of extra clear glass results in a virtually colorless product which allows objects to remain vivid and natural. This makes the lens distortion free and helps improve visibility, even in low light conditions underwater.

- Frameless 100% pure silicone skirt
- Saint-Gobain Diamant—crystal clear lens
- Wide vision and low volume

M3

The M3 Mask provides visibility, the most important aspect of any dive, with distortion-free vision and superior fit. This low profile design uses a rigid frame and two lenses with an ultra clear glass. The low iron content produces a higher light transmittance and a reduced green tint inherent in other glasses. This makes the lenses distortion free and helps improve color and visibility in low light conditions underwater. Optical lenses from -1.5 to -8.0 diopters available.

- Frameless 100% pure silicon skirt
- Saint-Gobain Diamant—crystal clear lenses
- Easily fitted with optical lenses from -1.5 to -8.0 diopters.
- Wide vision and low volume
- 4 way buckle design for superior comfort and storage if needed

MASKS & FINS

GoPro mount included with M3 Mask

M3 GOPRO® MOUNT

Mount your GOPRO® camera and housing on your M3 Mask for hands-free photography and video. Made from durable Delrin plastic, the M3 GoPro Mount is easy-to-install on the M3 with just a Hex Key Wrench. Once mounted, your camera and housing can be attached to your mask when needed and you can film your underwater adventures with ease.

M3 OPTICAL LENSES

The M3 may be easily fitted with Corrective Optical Lenses from -1.5 to -8.0 Diopters in 0.5 increments. Lenses are manufactured from optical quality UltraClear tempered glass. For ordering info, see pg 39.

M4

When choosing a mask, fit and field of vision come first. The M4 Mask gives you the best of both worlds, fitting a wide variety of faces and offering superior peripheral and vertical vision. It is low profile, stows easy and carries an excellent value.

- Frameless silicon skirt
- Rugged mask box and adjustable mask strap included
- Increased vision and low volume

F1 "BAT FIN"

The Hollis F1 fin blends graceful movement, power, and bulletproof construction making it the standard in technical diving.

- High grade, heavy-duty rubber construction
- Angled strap mounts for comfort and a better transition of power
- Spring heel straps with easy-grip heel tab
- Multiple strap mounting positions for a fine tuned fit
- Vented blade to reduce stress while accelerating
- Generous foot pocket

F1 LT

The new F1 LT is a shorter and slightly lighter version of the original F1 molded from SEBS. The LT is also more durable due to its UV resistant properties.

- Short blade for easier finning in confined spaces
- Angled strap mounts for comfort and a better transition of power
- Spring heel straps with easy-grip heel tab
- Multiple strap mounting positions for a fine tuned fit
- Vented blade reduces stress while accelerating water over blade
- Generous foot pocket

DUFFEL BAG

Made from a durable tarpaulin material, the Hollis Duffel is an excellent gear bag.

The bag is tough and rugged, extremely resistant to abrasions and punctures. It contains one main compartment featuring a tough D-zipper and one internal zippered pocket. Carrying the bag is an easy task with backpack shoulder straps. It also incorporates carry handles on both ends of the bag and two straps with padded handles. The bag is large enough to contain all of your dive gear and even features an ID pocket on top just by chance that someone has the same cool Hollis duffel bag as you.

D-zip main compartment with internal zippered pocket	
ID pocket on top	Backpack shoulder straps
Carry handles on both ends	Straps with padded handle
Rugged construction	Capacity: 95 Liters
Dimensions: 28" x 16" x 14"	

MESH DUFFEL BAG

Made from laminated nylon mesh, the Hollis Mesh Duffel is a great way to air out your wet equipment while keeping everything secure.

D-zip main compartment	
Shoulder carry strap included	
Carry straps with padded handle	
Rugged construction	

DRY BAG

This dry bag is ideal for all types of outdoor adventures, from camping to white water rafting, boat trips to biking. The classic stuff-sack design built to stay dry.

FINGER SPOOLS

Finger Spools are most often used as a Gap Reel or for Short Distance Exploration. Small and low-profile, a spool fits nicely out of the way in a pocket or clipped off to a D-ring. The holes in the side allow for clipping in a double-ended snap anywhere along the perimeter of the spool to keep the line tight when not in use. Hollis Stainless Steel Finger Spools, made from either 304L Stainless Steel or ABS plastic, are as rugged as they come. Or, choose the Hollis Finger Spool made of glass-filled nylon for durability in marine environments.

Available in 30 ft (9 m), 100 ft (30 m) and 150 ft (45 m)

The 30' is often used for GAP reels. The 100' and 150' Finger Spools are often used for shooting lift bags or as safety reel

Smaller spools for safety and jump reels

Spool fits in drysuit pocket, utility pocket or clipped off to a D-ring

Available in ABS plastic or 304L stainless steel

#24 white braid cave line

Stainless double ended clip included

You never know what you might find on a dive, so be prepared and always pack a Lift Bag. The Hollis 60 lb (27.2 kg) or 125 lb (56.7 kg) Lift Bag is just what you need to raise or mark items.

125-lb Lift Capacity

Tear and mildew-resistant durable nylon fabric

High-visibility bright orange for easy identification

Over pressure relief valve with pull dump

Stainless D-ring for line attachment

Handle at the top of the lift bag for easy handling

Lift bags are covered by a 12 month limited warranty

SIGNAL MARKER BUOYS

The Hollis Signal Marker Buoy (SMB) is an essential safety device all divers should carry on every dive. The SMB is the smart-way for a diver to mark their location when making safety stops, completing mandatory decompression stops, and signaling the boat if they surface a distance away from the boat.

Signal Marker Buoy is a Closed Cell Design made from Durable 300-D Polyester material with Radio Frequency (RF) Welded Seams. The Hollis SMB also has a Sturdy Nylon Webbing Strap Loop with a Stainless Steel D-Ring for attachment to a reel or anchor line along with a wrist lanyard for hand-held use.

6 ft (1.8 m), 3 ft (1 m)

Available in Yellow or Orange and compact Orange

Oral inflation

New stainless oral inflate valve

Open cell / closed cell

Quick Dump valve included

Buoy is covered by a 12 month limited warranty
